

DEPARTMENT OF THE AIR FORCE 59TH MEDICAL WING (AETC) JOINT BASE SAN ANTONIO - LACKLAND TEXAS

11 MAY 2016

MEMORANDUM FOR ST

ATTN: KAREN L WEIS

FROM: 59 MDW/SGVU

SUBJECT: Professional Presentation Approval

- Your paper, entitled <u>Pregnancy in the Military: Importance of Psychosocial Health to Birth Outcomes</u> presented at/published to <u>Scientific Panel, 2016 Military Women's Health Research Conference, USUHS, Bethesda, MD 25 April -27 April 2016 with MDWI 41-108, and has been assigned local file #16180.
 </u>
- 2. Pertinent biographic information (name of author(s), title, etc.) has been entered into our computer file. Please advise us (by phone or mail) that your presentation was given. At that time, we will need the date (month, day and year) along with the location of your presentation. It is important to update this information so that we can provide quality support for you, your department, and the Medical Center commander. This information is used to document the scholarly activities of our professional staff and students, which is an essential component of Wilford Hall Ambulatory Surgical Center (WHASC) internship and residency programs.
- 3. Please know that if you are a Graduate Health Sciences Education student and your department has told you they cannot fund your publication, the 59th Clinical Research Division may pay for your basic journal publishing charges (to include costs for tables and black and white photos). We cannot pay for reprints. If you are 59 MDW staff member, we can forward your request for funds to the designated wing POC.
- 4. Congratulations, and thank you for your efforts and time. Your contributions are vital to the medical mission. We look forward to assisting you in your future publication/presentation efforts.

LINDA STEEL-GOODWIN, Col, USAF, BSC Director, Clinical Investigations & Research Support

Linda Steel-Goodwin

PROCESSING OF PROFESSIONAL MEDICAL RESEARCH/TECHNICAL PUBLICATIONS/PRESENTATIONS

INSTRUCTIONS USE ONLY THE MOST CURRENT 59 MDW FORM 3039 LOCATED ON AF E-PUBLISHING

- 1. The author must complete page two of this form:
 - a. In Section 2, add the funding source for your study [e.g., 59 MDW CRD Graduate Health Sciences Education (GHSE) (SG5 O&M); SG5 R&D;
 Tri-Service Nursing Research Program (TSNRP); Defense Medical Research & Development Program (DMRDP); NIH; Congressionally Directed Medical Research Program (CDMRP); Grants; etc.]
 - b. In Section 2, there may be funding available for journal costs, if your department is not paying for figures, tables or photographs for your publication. Please state "YES" or "NO" in Section 2 of the form, if you need publication funding support.
- 2. Print your name, rank/grade, sign and date the form in the author's signature block or use an electronic signature.
- Attach a copy of the 59 MDW IRB or IACUC approval letter for the research related study. If this is a technical publication/presentation, state the type (e.g. case report, QA/QI study, program evaluation study, informational report/briefing, etc.) in the "Protocol Title" box.
- 4. Attach a copy of your abstract, paper, poster and other supporting documentation.
- Save and forward, via email, the processing form and all supporting documentation to your unit commander, program director or immediate supervisor for review/approval.
- 6. On page 2, have either your unit commander, program director or immediate supervisor:
 - a. Print their name, rank/grade, title; sign and date the form in the approving authority's signature block or use an electronic signature.
- Submit your completed form and all supporting documentation to the CRD for processing (59crdpubspres@us.af.mil). If you have any questions or concerns, please contact the 59 CRD/ Publications and Presentations Section at 292-7141 for assistance.
- 8. The 59 CRD/Publications and Presentations Section will route the request form to clinical investigations, 502 ISG/JAC (Ethics Review) and Public Affairs (59 MDW/PA) for review and then forward you a final letter of approval or disapproval.
- Once your manuscript, poster or presentation has been approved for a one-time public release, you may proceed with your publication or presentation submission activities, as stated on this form. Note: For each new release of medical research or technical information as a publication/presentation, a new 59 MDW Form 3039 must be submitted for review and approval.
- 10. If your manuscript is accepted for scientific publication, please contact the 59 CRD/Publications and Presentations Section at 292-7141. This information is reported to the 59 MDW/CC. All medical research or technical information publications/presentations must be reported to the Defense Technical Information Center (DITC). See 59 MDWI 41-108, Presentation and Publication of Medical and Technical Papers, for additional information.
- NOTE: All abstracts, papers, posters, etc., should contain the following disclaimer statement:
 - "The views expressed are those of the [author(s)] [presenter(s)] and do not reflect the official views or policy of the Department of Defense or its Components"
- NOTE: All abstracts, papers, posters, etc., should contain the following disclaimer statement for research involving humans:
 - "The voluntary, fully informed consent of the subjects used in this research was obtained as required by 32 CFR 219 and DODI 3216.02_AFI 40-402."
- NOTE: All abstracts, papers, posters, etc., should contain the following disclaimer statement for research involving animals, as required by AFMAN 40-401 IP:
 - "The experiments reported herein were conducted according to the principles set forth in the National Institute of Health Publication No. 80-23, Guide for the Care and Use of Laboratory Animals and the Animal Welfare Act of 1966, as amended."

PRENATAL PSYCHOSOCIAL HEALTH AND BIRTH OUTCOMES IN A MILITARY POPULATION

Keywords: Prenatal Maternal Anxiety, Early Gestational Age, Infant Birth Weight, Military

Background: Maternal psychological health has received increased attention because of the connection of prenatal anxiety to higher rates of spontaneous abortion (Nakano et al., 2004), preterm birth (Roy-Matton, Moutqui,, Brown, Carrier, & Bell, 2011), and low infant birthweight (Rondo et al., 2003). Prenatal depression has been linked to higher incidences of preterm birth (Dayan et al., 2006), decreased maternal attachment and sensitivity (Siddiqui & Hagglof, 2000), and cognitive delays in childhood (Pearson et al., 2013). Studies within the military community are limited. Purpose: Describe findings across a program of research dedicated to prenatal maternal psychosocial health to birth outcomes for a military population. Methods: Longitudinal design of repeated measures using the Social Support Index (SSI), the Lederman Prenatal Self-Evaluation Questionnaire (PSEQ), Edinburgh Prenatal Depression Scale (EPDS) and FACES II were provided to the participants in each trimester of pregnancy (across multiple studies). Subjects were various samples, one of 421 women from San Antonio area military health system and another of 300 women of mixed parity, all military beneficiaries, either active duty or dependant wives receiving prenatal care at Wilford Hall Ambulatory Surgical Center. Findings: Hierarchical linear regression models were used to assess the anxiety experienced prenatally on infant birth weight and early gestational age. Anxiety related to Acceptance of Pregnancy ($\beta = -0.15; p \le 0.001$), Identification of the Motherhood Role, Preparation for Labor ($\beta = 0.20; p \le 0.001$), Well-Being of Self and Infant ($\beta =$ $0.12; p \le 0.001$) were predictive of early gestational age. Anxiety related Helpless and Loss of Control ($\beta = 0.07; p \le 0.01$) and Preparation for Labor ($\beta = -0.05; p \le 0.05$) were predictive of low infant birthweight. These findings together with others formed the development of the Mentors Offering Maternal Support (M-O-M-S) program. Discussion: The findings provide convincing evidence that similar to civilian populations, military women experience prenatal anxiety that does effect birth outcomes. The findings indicate a need for early prenatal intervention designed for a military population.

 The opinions expressed in this presentation are solely those of the author and do not represent the views of the Department of Defense, or the United States Government

This correction letter replaces the approval letter dated 6 Feb 12

DEPARTMENT OF THE AIR FORCE

59TH MEDICAL WING (AETC) LACKLAND AIR FORCE BASE TEXAS

24 Feb 12

FINAL IRB APPROVAL (FULL BOARD - MINIMAL RISK)

Approval Date: 22 Nov 11

Principal Investigator: Col Karen Weis / SGN

IRB Reference Number: FWH20120012H

Assurance Number: FWA00001750 (Wilford Hall Ambulatory Surgical Center)

Protocol Title: "Mentors Offering Maternal Support (M.O.M.S.): Building Resilient Families"

- Your study, referenced above, is approved for <u>one year</u> as a <u>MINIMAL RISK</u> study by the Wilford Hall Ambulatory Surgical Center's Institutional Review Board (WHASC IRB). Additional items reviewed and approved by the WHASC IRB include:
 - PI Attachment 1 Centering Pregnancy program overview
 - Pl Attachment 2 M O.M.S. Mentor Training Agenda
 - PI Attachment 3 "Birth of a Mother" Guide
 - PI Attachment 4.1. Demographic Questions for M.O.M.S.
 - PI Attachment 4.2. Demographic Questions for Husband
 - PI Attachment 5 Welcome Letter to M.O.M.S. (script)
 - PI Attachment 6.1. Handout for M.O.M.S. Participants
 - PI Attachment 6.2. Handout for Husbands of M.O.M.S.
 - PI Attachment 7.1. M.O M.S. participant ICD
 - PI Attachment 7.2. Husband participant ICD
 - PI Attachment 8.1. Prenatal Self-Evaluation Questionnaire II (PSEQ) Instrument
 - PI Attachment 8.2. Maternal Antenatal Scale (MAAS) Instrument
 - PI Attachment 8.3. Rosenberg Self-Esteem Scale Instrument
 - PI Attachment 8.4. Family Adaptability and Cohesion Evaluation Scales II (FACES) Instrument
 - PI Attachment 8.5. COPE Instrument
 - PI Attachment 8.6. Edinburgh Postnatal Depression Scale (EPDS) Instrument
 - Pl Attachment 9 High Risk Screening Tool
 - PI Attachment 10 Semi Structured Interview Questions for Husbands
 - PI Attachment 11 Study Timeline
 - PI Attachment 12 M.O.M.S. Satisfaction Questionnaire
 - PI Attachment 14 Budget and External Funding Support
 - PI Attachment 17 HIPAA Authorization Document
- 2. Your study will be reviewed in 11 months for continuing review, based on its approval date, not to exceed 365 days. It is the WHASC IRB's decision that this study will be terminated as of 21 Nov12, unless you submit a continuing review report, using the template provided by the Protocol Office. Your first progress report, which is a request for continuation of the study, will be due to the Protocol Office no later than 1 Oct 12. A continuing review report will be due every 11 months thereafter, in order for the WHASC IRB to approve continuance of the study for another year. Upon completion of your study you must submit a final closeout report to the WHASC Protocol Office.

- 3 Following IRB review/approval, it is the PI's responsibility to ensure the Institutional Official (IO) or Authorized Institutional Official (AIO) provides written authorization to implement the study at their respective facility or facilities (if a multi-site protocol), in accordance with AFI 40-402, Section 2.5.5. This written authorization(s) must be forwarded to the WHASC Protocol Office <u>before</u> implementing your study (if applicable). The AIO approval memo must be received by the WHASC Protocol Office within 30 days of IRB review/approval notification, or the study will be withdrawn with no further action. Upon receipt of the AIO approval memo, the WHASC Protocol Office will issue a final study implementation letter, plus an original date-stamped ICD and any other IRB-approved documents needed for the study.
- 4. Only investigators listed below are approved to participate in the study (e.g., obtain consent and to interact with and/or collect identifiable information on research subjects):
- Col Karen L Weis, PI
- Lt Col Candy Wilson, Al
- Lt Col Brenda Morgan, Al
- · Lt Col Regina Paden, Al
- · Lt Col Nicole Armitage, Al
- Candice Hamel, Research Assistant / Coordinator

These are the only investigators identified by the WHASC IRB to have completed "IRB approved" investigator training. Any additions to this list must first be approved by the IRB by submitting an amendment, along with a copy of the investigator's training certificate.

- Your <u>MINIMAL RISK</u> study will be forwarded to the Surgeon General's Research Compliance and Oversight Office (AFMSA/SGE-C) for information and concurrence.
- 6. The WHASC IRB must be notified immediately of any additional information, or changes to the protocol. All amendments to either the protocol or ICD must be reviewed and approved by the WHASC IRB prior to their inception.
- You must comply with the information contained in the Certificate of Compliance.
- 8. If funds were requested for your study, you will be notified by the 59th Clinical Research Division Resource Manager (292-7924) concerning the status of the requested funds. YOU ARE NOT AUTHORIZED TO USE YOUR SECTION'S O&M FUNDS.
- If you have any questions, the POC is Protocol Office Staff at (210) 292-4012/292-6095/292-7143.
 Please include your project title and reference number in all correspondence or inquiries.

Disclosures

- No financial disclosures or conflict of interest
- author and do not represent the views of the Department of Defense, or the presentation are solely those of the The opinions expressed in this United States Government

Introduction

- Prenatal maternal anxiety is predictive of:
- Early gestational age (EGA)
- Lower birth weights (LBW)
- Higher rates of childhood illness
- Physical and cognitive developmental delays
- Prenatal depression is linked to LBW, EGA and poor maternal attachment

Military Findings

- Followed 501 military women thru pregnancy
- Prenatal maternal anxiety was predictive of:
- Early gestational age
- Lower birth weights
- Poor maternal-infant attachment
- Lower maternal role satisfaction

Pregnancy-Specific Anxiety

Identification with Motherhood (p<.001) Well-Being of Self and Infant (p<.001) Acceptance of Pregnancy (p<.001)Preparation for Labor (p<.01)

Gestational

Fears of Helplessness (p<.01)Preparation for Labor (p<.05)

Low - Birth Weight

Differences in AD/non-AD

Statistically significant differences for:

- Acceptance of pregnancy (p=.03; p=.01)^{1,3}
- Preparation for labor (p=.04)₁
- Relationship with husband $(p=.04;.02;.01)^{1,2,3}$

Anxiety greatest in AD and highest in the sample of AD Army women

Planned vs Unplanned Pregnancy

Status Active Duty (n=96) NonActive Duty (n=149)
--

Significantly higher anxiety for unplanned pregnancies:

- 1st trimester, Acceptance, F(1,231) = 22.86, p = .000
 - 2nd trimester, Acceptance, F(1,231) = 12.64, p = .000
- 3^{rd} trimester, Acceptance, F(1,231) = 7.32, p = .007

Postpartum Depression Statistics

Military Surveillance data (Do et al.,2013):

- 8.2% of service women diagnosed with PPD
- AD service women had increase in diagnosis for each year of study
- Highest rates in Army (12%) and lowest in Air Force (7.3%)
- Reports indicate higher rates for PPD in military than in civilian population

Prenatal Depression

2 nd Trimester	z	Mean	SD	Min	Мах
NonAD	147	4.25	3.87	00.	17.00
Air Force	29	3.99	3.91	00.	21.00
Army	24	8.25	5.47	1.00	24.00
Navy	2	7.00	99.5	3.00	11.00
Marine	2	5.50	3.54	00.	24.00

10 items with 0-3; higher scores indicating > depression Note: Depression measured with EPDS

for acceptance of pregnancy, well-being in pregnancy & Depression significant factor for increased anxiety relationship with husband

Issues Unique to Military (Prenatal Anxiety & Depression)

- Service before self
- Attitude present in family as well as service member
- Sacrifice everything for the mission
- Profound pressure to support spouse
- Spouse very involved in work; hesitant to ask for help
- AD women concerns for ramifications of pregnancy on career

Psychosocial Health in Pregnancy

- Anxiety related to pregnancy-specific factors and/or depression do not decrease without intervention
- threatened labor" & #5 "threatened Military has 1.16 million medical complications -- #3 being "other encounters/yr for pregnancy premature labor"

Ongoing Work

- Offering Maternal Support intervention Testing effectiveness of Mentors
- effects being assessed with biomarkers Psychosocial health and placental
- Effectiveness of interventions on birth requires longitudinal studies of large outcomes and long-term benefits numbers
